Overview

It is certainly a matter of subjectivity, but the two-mile tracks may be among the best NASCAR offers.

The radiuses of the corners at Michigan International Speedway and Auto Club Speedway compared to the track length most often contribute to two- and three-abreast racing.

al Raceway, so that short track can also be used as a comparative.

Qualification is important—but not prohibitively so. Poor track position can be overcome if a driver has a superior car. Given the length of the race, strategy often plays an important role, but the speeds obtained on this speedway type means that pitting is going to cost a lap, so one must

ual segment bonus point is going to matter, it is a wild card that cannot be ignored.

Success Predicts Success

Michigan and the two-mile tracks host a lot of sweeps. Most notably, four drivers swept the top five last year at Michigan including the summer winner Kyle Larson who finished third in the spring.

Sean Gardner / Getty Images NASCARMedia.com

Those multiple grooves mean drivers have an opportunity to move around and find the line that works best for them.

The balance of maneuverability and speed seems to be replicated on the similarly shaped, three-fourths-mile oval of Richmond International-

be careful.

These traits are going to be even more important with the addition of segments. There are now three opportunities per race to be in the top 10 when points are on the line. And since no one truly knows how big a factor each individ-

Chase Elliott finished second in both Michigan races last year, Brad Keselowski was fourth in the spring and third in the summer, while Kevin Harvick posted identical fifth-place finishes.

June's winner Joey Logano finished 10th in the summer

and was joined by Jamie McMurray as the only other driver to sweep the top 10, but there were several more who posted two top-15s.

The pattern is supported when Auto Club is factored in.

Keselowski and Logano both have current nine-race, top-10 streaks. Elliott has been perfect in that regard over four career starts. The other drivers already mentioned also have long streaks to their credit that are either perfect or have barely been interrupted.

Finally, if one looks back through the record books, this pattern repeats itself over and again—and it is not always the most powerful drivers and teams that find the secret to this track.

For a long time, Greg Biffle was great on this course type and more recently Paul Menard earned six straight top-10s.

Success predicts success, so make these drivers with their strong history anchors.

With so many rookies in the field, they cannot be ignored either. First-time drivers can do well on this course and Joe Gibbs Racing's Daniel Suarez and the Furniture Row affiliate Erik Jones might not only contend for top-10s, but poten-

tially the win.

The question of who would win first between sophomores Ryan Blaney and Elliott was answered last week in favor of Blaney. He might only beat Elliott by a single weekend, however, because the two-mile tracks and Michigan in particular have been extremely kind to the driver of the No. 24 – no matter who that driver is.

Elliott's pair of runner-up finishes were already mentioned in the overview of this newsletter and he showed strength start to finish with qualification efforts that landed in the top 10 as well. Elliott has also swept the top 10 at Auto Club with a sixth last year and a

10th this spring. In all four of his previous two-mile races, he has earned positive place-differential points in games that offer them and that makes him a double threat.

Larson got off to a great start on two-mile tracks in his rookie season. He finished second in the 2014 Auto Club 400 and then scored an eighth in his first Michigan attempt.

After that, he hit upon hard times with a crash-induced 43rd in summer 2014 and a string of results outside the top 10.

Another accident in the 2016 Auto Club 400 seemed to reverse his fortune again, because he has swept the top-three in his last three starts.

Harvick was one of four drivers who swept the top five at Michigan last year; in fact, he swept that mark on the two-mile tracks combined. His other strong showing on this track type was a runner-up finish in California last spring—a position to which he was extremely familiar.

Beginning with a second-place finish in Michigan's spring race of 2013 he finished exactly there in seven of nine races on the two-milers.

Keselowski shares the record for the longest active streak of top-10s on two-mile tracks with teammate Logano. Since both Penske pals are at the top of their game on this track type, that suggests the organization knows something about finding the perfect setup.

Keselowski has gotten even stronger in the past three races with a three-race, top-five streak that culminated in a second to Larson this spring at Auto Club.

In that streak of nine races, Keselowski's highs have been stellar with a win and more than half of them at the very head of the pack in the top five. He has an average finish of fifth in those events and should be able to get another this week.

Truex is in the top five this week because of his current 2017 momentum. Beginning with his GoBowling.com 400 victory at Kansas Speedway, he has accumulated four consecutive results of sixth or better with an average of 3.25.

The two-mile tracks have not

been his strong suit, nor has Michigan in particular. He seems to take them by waves, however, and since 2012 he has posted back-to-back top-10s twice on this course. His latest success came in 2015 when he finished third in both races. Given his strength in recent weeks, it is a fair bet he will challenge for a top-five.

McMurray's brakes failed last week at Pocono and sent him hard into the wall. That snapped a seven-race streak of top-12 finishes. Another incident at Martinsville Speedway has kept him from being perfect since leaving Daytona, but the vast majority of his efforts this season have been consistent top-15s.

The same pattern can be found on two-mile tracks. McMurray finished sixth this spring in the Auto Club 400. That was his fifth top-10 in the last six races on this track type with one other 16th-place result as the dissenting effort. He also swept the top 15 in 2014 and that means he has finished 16th or better in nine of his last 10 races on this course type.

Michigan is often kind to rookies. Elliott's second-place finish in this race last year is supported by another runner-up in Kasey Kahne's inaugural run and a like finish by Jeff Gordon when he was just getting started. Several other active drivers have top-10s in their first attempt.

Like Pocono, this is a type of track that should suit Suarez's driving style. He can be patient when needed, but will find enough room to make aggressive moves when that is called for. Last week he didn't perform quite as well as we

Winning at Pocono was likely just what Blaney needed to open the floodgates. This driver and team have been on the verge of being one of the top contenders. They started with four top-12 finishes in the first seven races, but interspersed among those were three results outside the top 15. As the bad finishes started outweighing the good ones, Blaney got frustrated and slowly slipped down the points' standings. Meanwhile, winners started stacking up and his chances of getting into the playoffs diminished.

Those considerations are gone now and Blaney can concentrate on running well. He has not yet scored back-to-back top-10s in 2017, but we are willing to bet that changes after the FireKeepers Casino 400.

Jones was hoping Blaney and Harvick would get side-by-side in the final laps at Pocono. That would have created a huge bubble of air and allowed him to make a move for the lead.

The scenario did not play out that way, but the simple fact that Jones was focused on how to make this a winning opportunity shows fantasy owners how good he is. He earned a career-best finish of third in the Axalta Presents the Po-

Brad Keselowski
Fantasy Power Average: 7.65

Keselowski has finished in the top-10 in his last six attempts at his home track of Michigan. His top-15 streak goes back further to 2011 as sets at 11 races. He bounced back from bad finishes at Charlotte and Dover with a top-five last week at Pocono, raising his total to eight top-five's in the first 14 races of the season.

Keselowski's last three qualifying efforts placed him in the mid-teens, all three ended with top ten finishes with an average place differential of +10.33. Keselowski has led laps in six of the last seven Michigan races, but has not yet won at his home track.

Chase Elliott
Fantasy Power Average: 3.00

Elliott has back-to-back second-place finishes in his first two starts at Michigan.

In those efforts he advanced from his qualification spot in both for an average of 5.5 spots. Last year he led 66 laps at the track. Elliott has two other top-10s at Auto Club, the other two-mile track on the circuit.

He has finished in the top 10 in eight of his 14 attempts this season, Elliott has yet to pull a first or second place finish, with Ryan Blaney becoming the third driver to record their first career win during the season all eyes will be on Elliott to see if he can follow suit.

Kevin Harvick
Fantasy Power Average: 8.85

Harvick has finished in the top five in seven out of eight of his most recent starts at the track. Harvick has a power average of 8.32 at two-mile tracks that's the highest power average at for a veteran driver, only falling behind Chase Elliott and Erik Jones who are helped with the limited starts at the tracks.

Harvick has one win at Michigan back in 2014 and has led in four of his last six

In its heyday, Roush-Fenway

Racing dominated the two-mile tracks with nearly every driver that climbed behind its wheel. As they faded, the results on these tracks became unreliable and then consistently poor—but the germ of power is still there. The knack for finding the right setup remains and, once implemented, the results are going to return.

Bayne's recent record on two-mile tracks is not good enough to make him a favorite. He has only one top-15 and an average of 20.5 in his last four

starts on this course type. But he is capable of scoring a top-10 and if the No. 6 is strong in practice and qualification, he could get the nod for the final slot on one's roster.

He's still looking for his first win , which is becoming more important as drivers behind him in points win and virtually secure their spot in the chase. Drivers like Harvick, Logano, and Busch will all be bringing their A-game to try to secure their spot.

Ryan Blaney
Fantasy Power Average: 14.42

Blaney gained his fifth top-10 of the season when he battled hard for the win last week at Pocono. This win came after two bad finishes and stopped a potential slump, instead we're now hopefully looking at a driver hungry for another great finish.

Blaney finished fourth at Michigan last fall, this has been his best finish in his current four starts at the track as they've improved in each try from 24th in his first appearance.

Paul Menard
Fantasy Power Average: 12.71

Menard may only have two top tens this season, but it keeps him cheap and he has a average within the top-15 at Michigan.

Menard has advanced from his starting position in the last seven runnings of the race, for during those races an average of place differential of +8.14. Which is insanity good over that many races.

Matt Kenseth
Fantasy Power Average: 11.57

Kenseth had been one of the most reliable racers of the season. He's in the middle of a four race, top-15 finish streak at Michigan which includes his fall 2015 win. He's led in three of the last four races with an overwhelming majority during the race of his win.

er finished worse than 20th in 16 races on two-mile tracks. Nearly one-third of these effort netted top-10s and all but four were top-15s.

The odds are great that he is going to finish somewhere between 11th and 17th this week and knowing that allows fantasy players to plan accordingly. The likelihood of a top-10 is low, however, because he has not finished that well at Michigan or Auto Club since summer 2015.

Johnson took a hard hit last week at Pocono after a catastrophic brake failure. That was the third time in the past four races that he failed to crack the top 15.

Michigan has been kind to him in stages, but he has not shown consistency there. After several close calls while he watched his teammates win, Johnson finally found Victory Lane in 2014. That is his only top-five on this track since spring 2012 and one of only three top-10s. Busch won the 2011 Pure Michigan 400 in a season when he swept the top five on this track.

He has added only one more top-10 to his tally in the 10 races that followed and has two other top-15s. That is not a good record for a driver of his caliber and it means that he needs to be rested for the week.

Most of his poor Michigan results have been due to bad luck and on-track incidents, but that is part of this sport and five sub-30th-place results in the past seven races gives him an average finish of 32nd.

^ The last six races average is from the last six races of this season; the driver may not have run in all of those events.

This statistic and the average finish for the last three years include failures to qualify (DNQ) as if they were actually finishes; i.e. the first non-qualifier is credited with a 44th-place finish. This is true for the statistics at all levels of the game, but is more like to skew the numbers in Group
